Threat Intelligence Led Adversary Emulation That Leverages Real World Tools/Tactics, Techniques, And Procedures (TTPs)

Do you know which threats may be targeting your business and the tactics, techniques, and procedures the attackers are going to use? Have you established the necessary security controls to prevent, detect, and respond to modern attacks? In short, are your organisation's hybrid cloud and on-premises environments as secure as you think they are?

Validate and Improve Your Security Posture With a Purple Team Engagement

Organisations today are managing a growing volume of data and alerts while dealing with tight budgets and vulnerable legacy systems. Amongst the noise it's easy to set and forget technology and miss potential problems. You don't want to discover that controls are ineffective during a real attack. A Purple Team Assessment can help confirm controls are working and identify any gaps. We help you develop a strategic plan, customised for your organisation and based on the recommendations of Microsoft cybersecurity experts.

You'll gain visibility into immediate threats across email, identity, and data, plus clarity and support on how to upgrade your security posture for the long term.

Why You Should Attend

This is a fully interactive experience where we work in collaboration with your team to thoroughly test and verify the effectiveness of prevention and detection. Get help achieving your broader security objectives and identify current and real threats. By scheduling a Purple Team Assessment, you can:

- Identify current threats and ongoing risks to your business, and validate your ability to defend against them
- Walk away with actionable recommendations based on your specific needs and objectives
- Improve prevention, detection, and response capabilities in collaboration with Red and Blue team experts
- Better understand how to defend against credible threats to your business.

Engagement Highlights

- Test and validate your ability to protect, detect, and respond to real world attacks
- Understand your current security posture and what needs to improve
- Establish objectives that can drive strategic and tactical security improvement
- Provide assurance to stakeholders and interested parties
- Upskill your security team and improve prevention and detection capabilities

What to Expect:

During the assessment, we'll partner with you to strengthen your organisation's approach to cyber defence. We'll help you to better understand how to defend against modern attacks and how to prioritise and mitigate potential attacks, with:

- **Targeted** threat intelligence on **credible threats** that could target your organisation
- **Actionable** recommendations and support to help immediately close gaps and mitigate the identified threats
- A **real-world adversary emulation** using the tools, techniques, and procedures deployed by the selected threat actor
- An inside look at Bridewell's **holistic approach to security**, and how we can help support your organisation
- Access to **expert** red and blue team operators to help assess and **improve your cyber defence capabilities**
- **Long-term recommendations** from cyber defence experts about your **security strategy**, with key initiatives and tactical next steps.
