

Azure VMware Solution (AVS) Discovery Assessment

Service Approach

The Assessment covers the following areas:

- Overview of the Azure VMware Solution
- Assessment of your current VMware estate (including an inventory of all assets)
- Migration Planning (including area of network design, accurate sizing)
- Monthly cost estimation based on discovery data

Optional elements below can also be covered:

- Advice on modernising the on-prem environment
- How you should secure and protect a new hybrid environment

Service Deliverables

After the Assessment, you will have a good understanding of:

- The AVS offering and the associated features, functionality and benefits
- How you can integrate AVS with your on-premise environment
- Your current estate, the infrastructure that can be moved and how you can move it
- Cost estimations based on discovery data
- An understanding of VMware's HCX technology and a high-level plan for migration
- How you can take advantage of Azure's broad suite of native services

Service Description

The Trustmarque AVS Discovery Assessment aims to familiarise you with Azure VMware Solution (AVS) and assess your environment in readiness for moving or extending your on-premise VMware environments to Microsoft Azure. The Assessment will assess suitability, perform performance-based sizing and estimate costs giving you a clear understanding of the suitability of AVS for your business.

AVS Use Cases

- Datacentre footprint reduction, consolidation, and retirement
- Datacentre expansion based on demand
- Disaster recovery and business continuity
- Application modernization
