- Cloud platform service availability, health monitoring and workload management
- Backup and BCDR using Azure Site Recovery and Vault services
- 24x7 Escalation via Business Support, 24x7 Service Desk Support
- Compliance monitoring to close the gap of public cloud offering using a robust set of managed compliance controls and standards to adheres to compliance requirements.

Assess

Understand

Onboard

Manage

Zensa's Process

Assess:

Collaboratively, review customer's current support/service plans and determine service level agreements, requirements and options

Understand:

Zensa will work closely with customer to understand the operational management of services in Azure, build a detailed plan to lessen complexity, accelerate transformation, and optimize investments.

Onboard:

Fully onboard customer tenancies into our management framework (Lighthouse)

Manage:

Health and performance monitoring, cost optimizations, security and compliance monitoring/enhancements. BCDR and backup solutions with always available, 24x7 support operations

ZENSA'S CLOUD TECHNOLOGY SERVICES

Cloud Enablement

- Cloud ROI and TCO Analysis
- Workload Discovery and Assessment
- Migration Planning
- Datacenter Migrations
- Data/Database Migrations
- Cloud Reseller
- Migrations Training

DevOps, AIOps Automation

- DevOps Capability Assessment Services
- Continuous Integration, Delivery, Deployment Pipeline Design and Implementation
- Automation Services
- Compliance and Security Services (Hardening)
- DevOps Training

IoT Solutions, Data, Analytics

- IoT Solutions Architecture Design
- Sessions (devices and applications)
- IoT Automation and Hardening
- IoT Edge Implementation Services.
- Insights and Analytics
- IoT Training

Application Services

- App Modernization (Micro-services, Docker, Functions, Event Driven)
- Application Perf Tuning & Monitoring
- Legacy Application Migration
- Mixed/Virtual/Augmented Reality
- AI & Machine Learning
- 3D UI/UX Designing
